7. Write a project description that will serve as a stand-alone summary of the project for legislative review. The description should summarize the entire project's intended purpose, the purpose of the funds requested (if request is a sub-part of the entire project), and most importantly the detail on how the funds requested will be spent - for example how much will be spent on positions and associated salaries, specifics on capital costs, and detail of operational expenses. The summary must list what local, regional or statewide interests or areas are served. It should also document the need for the funds, the community support and expected results when applicable. Be sure to include the type and amount of services as well as the number of the specific target population that will be served (such as number of home health visits to X, # of elderly, # of school aged children to receive mentoring, # of violent crime victims to receive once a week counseling etc.)

This project consists of construction upgrades to existing (substandard and outdated drainage systems) throughout the City. The proposed improvement areas were identified in the City's Stormwater Management Master Plan and Capital Improvement Plan as immediate water projects. The proposed improvement will provide much needed water quality standards and flood mitigation required for the National Pollution Discharge Elimination System (NPDES) and BMAP. The State's Department of Environmental Protection (DEP) has verified the City as having local fecal coliform, although no Total Maximum Daily Load (TMDL) has officially been set under WBID#3283. The DEP will complete the assessment for Broward County in 2016. As a proactive initiative to any future or potential impairments, the City is working along with Broward County and our sister cities to address proactive inspections, reactive inspections and high risk facilities inspections. These BMAP improvements will include a) catch basins; b) drainage pipes and drainage outlets; c) trenches; d) curbs; e) gutters; f) drainage structures; and g) landscaped drainage retention areas. These Citywide Drainage Improvements will enhance water quality and help reverse the adverse impacts of Canal C-9. Once completed, we anticipate this improvement to benefit 14,156 residents and approximately 400 businesses within this region of the state. The City of West Park is prepared to maintain the project, upon completion.

8. Provide the total cost of the project for FY 2016-17 from all sources of funding:

- Federal: 0
- State: 0 (Excluding the requested Total Amount in #4d, Column G)
- Local: 25,000
- Other: 0

9. Is this a multi-year project requiring funding from the state for more than one year?

No
