Autism Navigator? is a unique collection of web-based tools and courses developed to bridge the gap between science and community practice. Each tool or course is designed to increase the capacity of healthcare providers, early intervention providers, educators, and families to improve outcomes of children with autism spectrum disorder. We have integrated current research into a highly interactive web platform using extensive video footage to illustrate effective evidence-based practice. The web-based instructional system has utilized resources available from federally funded research projects awarded to the Autism Institute in the College of Medicine at Florida State University.
