7. Write a project description that will serve as a stand-alone summary of the project for legislative review. The description should summarize the entire project's intended purpose, the purpose of the funds requested (if request is a sub-part of the entire project), and most importantly the detail on how the funds requested will be spent - for example how much will be spent on positions and associated salaries, specifics on capital costs, and detail of operational expenses. The summary must list what local, regional or statewide interests or areas are served. It should also document the need for the funds, the community support and expected results when applicable. Be sure to include the type and amount of services as well as the number of the specific target population that will be served (such as number of home health visits to X, # of elderly, # of school aged children to receive mentoring, # of violent crime victims to receive once a week counseling etc.)

This program will provide funding for a high school audio visual/technology grant program similar to a program currently being administered in Georgia. Under this program, schools will apply for a grant that will allow them to acquire an AV/Technology package consisting of high-end HD video camera packages, Extreme Series Encoding Workstations, and associated graphics software that are all used in television and film production. IN addition, the package would provide for 24 months of secure 1 TB server storage, technical support, and upfront training of teachers on how to use the equipment and graphics software. The packages cost \$25,000 per school, so 100 high school will be able to participate in this program. In Georgia, the first 100 schools were brought on board within six months of implementation. By the end of 2015, over 300 Georgia schools will have had the packages installed, and to date, over 7,000 high school students have been trained to use these highly sophisticated programs.

The grant will fund AV/T equipment packages that provide schools with the equipment, server storage capacity, and technical support to provide students with opportunities to earn course credits and industry certifications in the Arts, A/V Technology & Communications primary career clusters. Currently, as many as eight CAPE industry certifications could be obtained by students who are trained to use the equipment and graphic software included in this package.
