7. Write a project description that will serve as a stand-alone summary of the project for legislative review. The description should summarize the entire project's intended purpose, the purpose of the funds requested (if request is a sub-part of the entire project), and most importantly the detail on how the funds requested will be spent - for example how much will be spent on positions and associated salaries, specifics on capital costs, and detail of operational expenses. The summary must list what local, regional or statewide interests or areas are served. It should also document the need for the funds, the community support and expected results when applicable. Be sure to include the type and amount of services as well as the number of the specific target population that will be served (such as number of home health visits to X, # of elderly, # of school aged children to receive mentoring, # of violent crime victims to receive once a week counseling etc.)

Florida's K-12 education facilities funding mechanism is based upon the ad valorem tax. It assumes a District's land values will produce the needed revenue to provide education facilities for that school district's student population. This approach is sound in almost all school districts. However, in a small number of districts, relatively low land values coupled with the extremely high student growth rate results in a shortfall of capital needed to meet the district's student station needs.

The Legislature has recognized this aberration by enactment of Chapter 1013.738 High Growth District Capital Outlay Assistance Grant Program in 2005. This funding formula measures ad valorem land value, growth rate, and local effort which results in identifying districts which are unable to afford necessary student stations for their student population.

The Legislature provided high growth grant money to such districts in 2002,2003 and 2005. The downturn in the economy retarded growth throughout the state ending the immediate need to find the program. With the resurgence of the economy, some district are again unable to provide needed student stations due to the rate of growth and low revenue producing ad valorem values.

8. Provide the total cost of the project for FY 2016-17 from all sources of funding:

Federal: 0

State: 0 (Excluding the requested Total Amount in #4d, Column G)

Local: 0

Other: 0

9. Is this a multi-year project requiring funding from the state for more than one year?

Yes
