The description should summarize the entire project's intended purpose, the purpose of the funds requested (if request is a sub-part of the entire project), and most importantly the detail on how the funds requested will be spent - for example how much will be spent on positions and associated salaries, specifics on capital costs, and detail of operational expenses. The summary must list what local, regional or statewide interests or areas are served. It should also document the need for the funds, the community support and expected results when applicable. Be sure to include the type and amount of services as well as the number of the specific target population that will be served (such as number of home health visits to X, # of elderly, # of school aged children to receive mentoring, # of violent crime victims to receive once a week counseling etc.)

BACKGROUND:

Old Kings Road is a high-traffic roadway that parallels and eventually merges with U.S. 1. The bridge targeted for replacement, which traverses Little Trout River, is functionally obsolete, and the balustrades are regularly damaged by vehicles due to the bridge's narrow shoulders.

PROJECT DESCRIPTION:

The existing bridge will be completely replaced with a new structure that features wide shoulders to match other bridge structures on Old Kings Road. The Jacksonville City Council recently appropriated \$100,000 toward the completion of this project.

PROJECT TIMELINE:

To expedite progress on this project, the city is using the design/build method of delivery. Design is currently at 60 percent. The project could be fully constructed within a year following receipt of funding; construction could start concurrent with design completion.

Phase	Estimated Time to Complete
Design and Permitting	3 months
Construction	8 months

BENEFITS:

Old Kings Road is a major thoroughfare in the northwest section of Jacksonville. Other bridge structures on this corridor were replaced with more modern facilities in the recent past; replacement of this bridge exceeded the funding available at the time. Due to the frequent damage resulting from the narrow shoulders, this bridge is costly to maintain as well as functionally obsolete.

8. Provide the total cost of the project for FY 2016-17 from all sources of funding:

Federal: 0

State: 0 (Excluding the requested Total Amount in #4d, Column G)

Local: 100,000

Other: 0

9. Is this a multi-year project requiring funding from the state for more than one year?

No
