The summary must list what local, regional or statewide interests or areas are served. It should also document the need for the funds, the community support and expected results when applicable. The target population is children ages 11 to 21 years of age, with a mental health diagnosis that may include other co-occurring diagnoses, e.g. substance use disorder. The CAT Team provides family-centered, culturally competent services focused around the strengths and needs of each child and family with a goal of supporting and sustaining the child in his/her family system and community. Medical staff provide psychiatric care, basic health status checks, and work with the family to maintain linkages to community health care practitioners. The entire family is embraced in care, and family commitment and participation is essential and expected. The CAT Team assists the family in developing a natural support network, improving interactions with the school system, and developing and using other community resources and supports.
