- c. Service Area (Counties being served by the service(s) provided with funding) Hillsborough

7. Write a project description that will serve as a stand-alone summary of the project for legislative review. The description should summarize the entire project's intended purpose, the purpose of the funds requested (if request is a sub-part of the entire project), and most importantly the detail on how the funds requested will be spent - for example how much will be spent on positions and associated salaries, specifics on capital costs, and detail of operational expenses. The summary must list what local, regional or statewide interests or areas are served. It should also document the need for the funds, the community support and expected results when applicable. Be sure to include the type and amount of services as well as the number of the specific target population that will be served (such as number of home health visits to X, # of elderly, # of school aged children to receive mentoring, # of violent crime victims to receive once a week counseling etc.)

This project will enable Plant City to develop a stormwater asset management plan for its drainage inlets, piping, ponds and stormwater conveyance systems. The development of a citywide stormwater asset management plan would provide useful information on several important stormwater routing studies, provide financial asset information and provide a program for the improvement and replacement of existing drainage facilities. The stormwater asset management plan would provide the GPS location and rim elevation of all of the drainage catch basins, invert elevations of all drainage pipes, lengths of pipes, pipe slopes, cross sections and lengths of stormwater conveyance systems (swale, ditch or canal), and the interior condition of all pipes. This data can then be utilized in the development of a Countywide Stormwater Master Plan and FIMA Base Flood Elevations which is currently being completed as a joint venture between Hillsborough County and the Southwest Florida Water Management District. Providing this data to Hillsborough County and the Southwest Florida Water Management District for inclusion in the Countywide Stormwater Master Plan and the FIMA Base Flood Elevations Maps would greatly benefit the property owners in Plant City. The current FIMA Base Flood Elevations Maps are expected to be revised in 2017/2018.

8. Provide the total cost of the project for FY 2016-17 from all sources of funding:

- Federal: 0
- State: 0 (Excluding the requested Total Amount in #4d, Column G)
- Local: 0
- Other: 0

9. Is this a multi-year project requiring funding from the state for more than one year?

No
