7. Write a project description that will serve as a stand-alone summary of the project for legislative review. The description should summarize the entire project's intended purpose, the purpose of the funds requested (if request is a sub-part of the entire project), and most importantly the detail on how the funds requested will be spent - for example how much will be spent on positions and associated salaries, specifics on capital costs, and detail of operational expenses. The summary must list what local, regional or statewide interests or areas are served. It should also document the need for the funds, the community support and expected results when applicable. Be sure to include the type and amount of services as well as the number of the specific target population that will be served (such as number of home health visits to X, # of elderly, # of school aged children to receive mentoring, # of violent crime victims to receive once a week counseling etc.)

Established and first funded by the Legislature in 2014, the Florida Center for Cybersecurity at USF will position Florida as the national leader in cybersecurity and its related workforce through education and research (s. 1004.444, F.S.). We request additional funding for Phase II of this initiative (\$5 million plus \$650,000 not yet funded in Phase I), as detailed in the BOG report calling for the Center's establishment (pg. 13) to: expand and accelerate capacity for education and training of the high-skilled, high-paid cybersecurity workforce through increasing access to affordable degree, certificate, and professional certification programs; extend the seed/matching-grant program for Florida's universities and research entities to yield strategic returns on investment through growing federal and industry R&D expenditures, patents and licensing revenues, startup companies, etc. If funded, USF projects increasing the number of new professional cybersecurity certifications to be awarded annually via both face-to-face and online courses to 550, each with earning potentials of approximately \$100,000. Additionally, this funding will help the Center reach its goal of drawing at least \$50 million in research dollars to the state over 5 years. If appropriated, the funds will primarily be used to hire 36 new highly-qualified faculty to expand access to cybersecurity programs and degree offerings as well as provide up to \$1 million in new seed research grants across the SUS.

8. Provide the total cost of the project for FY 2016-17 from all sources of funding:

Federal: 0

State: 0 (Excluding the requested Total Amount in #4d, Column G)

Local: 0

Other: 0

9. Is this a multi-year project requiring funding from the state for more than one year?

Yes
