☑Enhance/preserve/improve environmental or fish and wildlife quality	The reclaimed water system would service all residential neighborhoods in the surrounding area as well as the sports park. There are numerous benefits of expanding the City?s reuse system. First, providing reclaimed water to both business and commercial customers removes demand from the treated water system by providing reclaimed water for irrigation water needs. It will also reduce the impact of discharging treated effluent to the discharge wetlands in the Panama City Beach	There are 460 connections on the south side of Panama City Beach Parkway that could be added to the reclaimed water system.
□Protect the general public from harm (environmental, criminal, etc.)		
□Improve transportation conditions		
☑Increase or improve economic activity	The Bay County Tourist Development Council (TDC) is currently in the design phase of a large sports park project. It is proposed that the reclaimed water main extension would be able to serve all residential neighborhoods in this area as well as the sports park.	The sports park will draw visitors to use the facility and improve economic activity in the local and surrounding areas.
□Increase tourism		
□Create specific immediate job opportunities		

□Enhance specific individual?s economic self sufficiency		
□Reduce recidivism		
□Reduce substance abuse		
□Divert from Criminal/Juvenile justice system		
□Improve wastewater management		
☑Improve stormwater management	This project will also reduce the impact of discharging treated effluent to the discharge wetlands in the Panama City Beach Conservation Park.	The amount of additional water distributed to the reclaimed water system will be the same quantity of water that is no longer distributed to the wetlands.
□Improve groundwater quality		
☑Improve drinking water quality	Expanding the City's reuse system will provide reclaimed water to both business and commercial customers removes demand from the treated water system by providing reclaimed water for irrigation and other non potable water uses.	Particularly during peak use times, it will reduce the impact to the City?s potable water pumping requirements in addition to reducing the impact on ground water supplies from private irrigation wells in the area.
□Improve surface water quality		
□Other (Please describe):
