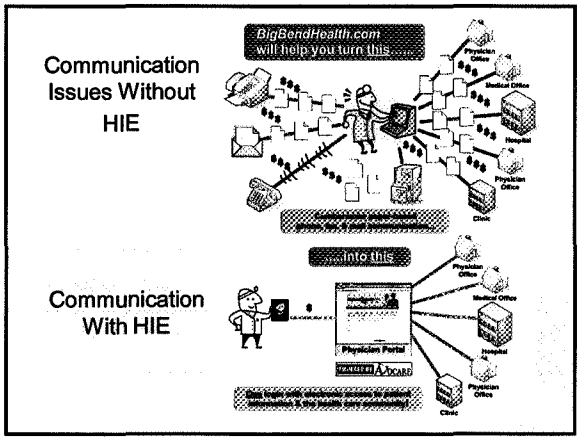
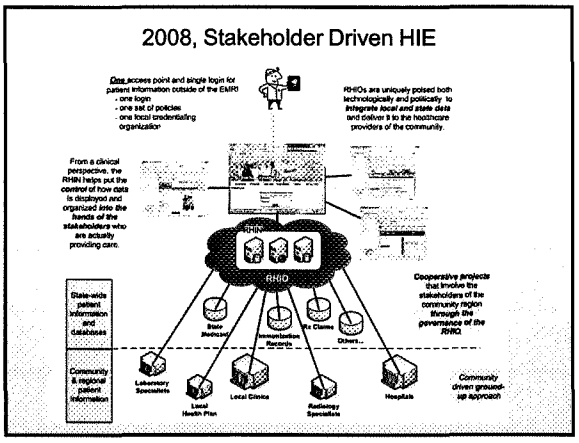
2005- Default Exchange (HIE) Pathway



Communication Issues Without HIE
BigBendHealth.com will help you turn this
into this
Communication With HIE
Physician Portal



2008, Stakeholder Driven HIE
One access point and single login for patient information outside of the EMR!
- one login
- one set of policies
- one local credentialing organization
RHIOs are uniquely poised both technologically and politically to integrate local and state data and deliver it to the healthcare providers of the community.
From a clinical perspective, the RHIN helps put the control of how data is displayed and organized into the hands of the stakeholders who are actually providing care.
RHIN
RHIO
State-wide patient information and databases
Community & regional patient information
Cooperative projects that involve the stakeholders of the community region through the governance of the RHIO
Community driven ground-up approach

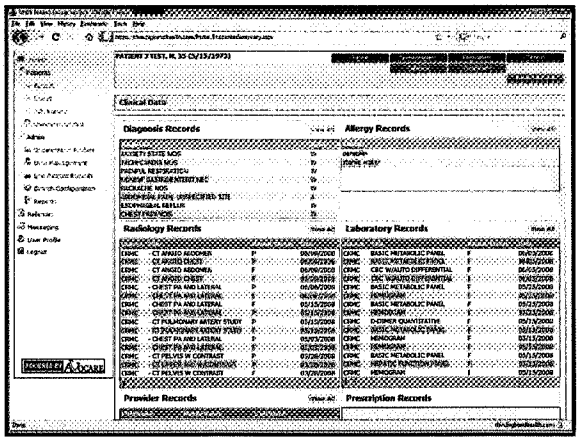
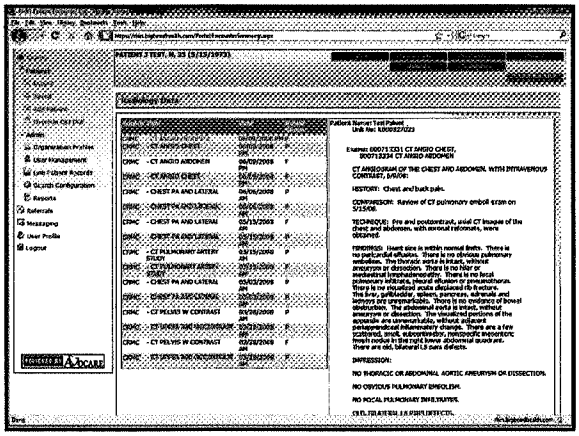
HIE versus EMR

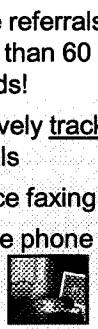


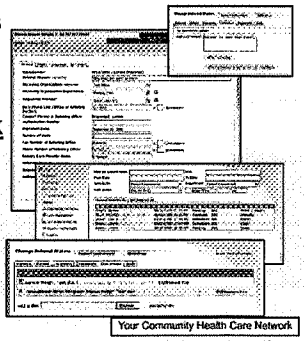


BigBendHealth.com

Referral Management

- Create referrals in less than 60 seconds!
- Effectively track referrals
- Replace faxing
- Reduce phone calls



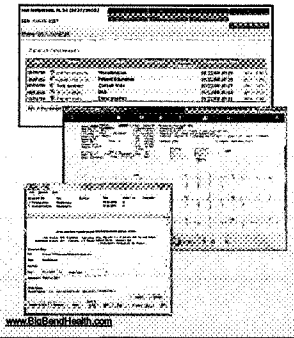


www.BigBendHealth.com

Your Community Health Care Network

BigBendHealth.com

Don't Need EMR to Participate



- Secure document publishing
- Attach to referrals
- Send as clinical message
- "Print" to RHIN
- "Fax" to EMR

BigBendHealth.com

Provider Messaging & Notifications

- Easy to use
- Receive real-time notifications of clinical messages & their updates
- Think email & social networking that is HIPAA compliant

Lessons Learned

(Just a Few)

- The need for HIE is local, we must exchange data locally first
- Minimal local exchange infrastructure currently exists
- The healthcare transformation common denominator is HIE
- HIE lags well behind EMR focus yet must be achieved in parallel
- EMR adoption without HIE provides limited overall efficiencies
- Lack of leadership continuity has been a significant barrier
- Provider governance is paramount
- Existing EMR systems contain the majority of data that will be exchanged over the next 3-4 years.
- Existing EMR interface fees are significant barrier to short term exchange
- Focused effort on existing clinical data repositories could facilitate tremendous HIE in 12-18 months

Big Bend Health Now

BBRHIO has live production data interface connections to the following EMR vendors:

Allscripts
Cerner
GE - Centricity
GE - Radiology Imaging System (RIS)
Meditech
Misys
EHS Success
Visionary

Big Bend Health Now

BBRHIO is in development of data interface connections with the following EMR vendors:

Greenway
eMDs
NextGen
Mckesson
Bevta USA
Biometrix

Big Bend Health Now

- Can provide stakeholders with direct lab reporting required by DOH and CDC
- BBH has a test instance of the NHIN CONNECT open source gateway and has started the NHIN 3-6 month process
- BBH is in the testing phase of the HITSP IHE XDS.b (Cross-Enterprise Document Sharing-B) Document Transaction Web Services for CCD clinical summary document within the IHE Document Registry and Repository Framework.
  - This will likely be Allscripts first production deployment of the HITSP IHE XDS.b CCD transaction in the nation
