**TIED BILLS:** **IDEN./SIM. BILLS:** SB 754

REFERENCE	ACTION	ANALYST	STAFF DIRECTOR or BUDGET/POLICY CHIEF
Orig. Comm.: Transportation & Highway Safety Subcommittee	13 Y, 0 N	Thompson	Miller

### SUMMARY ANALYSIS

Currently, when a vehicle is considered a “total loss,” it is considered “salvage,” and may be acquired by a salvage motor vehicle dealer. However, before a total loss vehicle may be acquired by a salvage motor vehicle dealer, the vehicle owner (usually the insurance company) must apply for a salvage certificate of title (Salvage Title) or a certificate of destruction (COD). When applying for a Salvage Title or COD, the insurance company must provide the Department of Highway Safety and Motor Vehicles (DHSMV) with an estimate of the costs of repairing the physical and mechanical damage. If the estimated costs of repairing the vehicle are equal to or more than 80 percent of the current retail cost of the vehicle, as established in any official used car or used mobile home guide, DHSMV is required to declare the vehicle unrebuildable and print a COD.

The PCB revises the process for applying for a Salvage Title or COD for a total loss motor vehicle. The PCB removes the 80 percent threshold that requires DHSMV to declare the vehicle unrebuildable and print a COD. In doing so, the PCB replaces the 80 percent threshold with a requirement that DHSMV print a COD if a motor vehicle or mobile home:

- Is damaged, wrecked or burned to the extent that the only residual value of the vehicle is as a source of parts or scrap metal; or
- Comes into this state under a title or other ownership that indicates that the vehicle is non-repairable, junked, or for parts or dismantling only.

In either case, the owner or insurance company which pays money as compensation for total loss of a motor vehicle or mobile home would be required to obtain a COD.

A Salvage Title indicates that the vehicle is repairable and a COD indicates that the vehicle is not repairable. There is a \$2 fee for each Salvage Title, which is deposited into the General Revenue Fund, and a \$3 fee for each COD, which is also deposited into the General Revenue Fund.

Before a salvage motor vehicle dealer resells a repaired salvage motor vehicle, the salvage motor vehicle must go through a physical rebuilt inspection conducted by DHSMV. There is a \$40 fee for the initial rebuilt inspection, which is deposited into the General Revenue Fund. If a subsequent inspection is required, there is a \$20 fee, which is deposited into the Highway Safety Operating Trust Fund.

Currently, there are approximately 130,000 more CODs than Salvage Titles issued annually. To the extent that a greater number of salvage vehicles will be able to be repaired and resold as rebuilt vehicles, the PCB will have a positive fiscal impact on insurance companies, the insurance auto auction industry and other entities involved in the sale of Salvage Title vehicles; a negative fiscal impact on the automotive recycling and parts industry and other entities involved in the sale of parts from COD vehicles; and a positive fiscal impact on the General Revenue Fund and the Highway Safety Operating Trust Fund. See Fiscal Analysis for additional information.

The PCB provides an effective date of July 1, 2014.

# FULL ANALYSIS

## I. SUBSTANTIVE ANALYSIS

### A. EFFECT OF PROPOSED CHANGES:

#### Present Situation

##### Total Loss

Currently, Florida law defines a motor vehicle (vehicle or mobile home) as a ‘total loss’<sup>1</sup> when:

- an insurance company pays the vehicle owner to replace the wrecked or damaged vehicle with one of like kind and quality or when an insurance company pays the vehicle owner upon the theft of the vehicle<sup>2</sup>; or
- an uninsured vehicle is wrecked or damaged and the cost, at the time of loss, of repairing or rebuilding the vehicle is 80 percent or more of the cost to the vehicle owner of replacing the wrecked or damaged vehicle with one of like kind and quality.<sup>3</sup>

However, the vehicle owner and the owner’s insurance company may reach an agreement to repair, rather than replace, the vehicle. In this case, the vehicle is not considered a ‘total loss,’ unless the actual cost to repair the vehicle to the insurance company exceeds 100 percent of the cost of replacing the vehicle with one of like kind and quality. If the cost to repair does in fact exceed 100 percent of the replacement cost, the vehicle owner must request that DHSMV brand the vehicle’s certificate of title with the words ‘Total Loss Vehicle.’<sup>4</sup>

##### Salvage Titles

From a national perspective, the purpose of a salvage motor vehicle title is to indicate that a vehicle has been severely damaged or declared a total loss at some point in its history, and to provide a traceable record for such vehicles the titles to which have been surrendered. Before disposing of or selling a total loss vehicle, the owner or insurance company is usually required to apply for some type of a salvage motor vehicle title. In such cases, the certificate of title is submitted to the respective state’s titling agency, and depending on the state and level of damages, the vehicle may be designated rebuildable or unrebuildable<sup>5</sup> and, thereby receive the appropriate title designation. If the vehicle is deemed rebuildable, some states, including Florida, allow it to be repaired, inspected, and ultimately returned to the road. If the vehicle is deemed unrebuildable, the vehicle must be destroyed or dismantled.

Typically, the insurance company has its own procedure for the disposition of rebuildable or unrebuildable total loss vehicles. In Florida, many insurance companies have an agreement with a motor vehicle auction company<sup>6</sup> to acquire, apply for title of, and sell, the vehicle. The auction

<sup>2</sup> s. 319.30(3)(a)1.a., F.S.

<sup>3</sup> s. 319.30(3)(a)1.b., F.S.

<sup>4</sup> s. 319.30(3)(a)(2), F.S.

<sup>5</sup> The American Association of Motor Vehicle Administrators, Best Practices for Title and Registration of Rebuilt and Specially Constructed Vehicles, November 2012, at page 3, defines a “non-repairable vehicle” as a motor vehicle that is damaged, destroyed, wrecked, burned or submerged in water to the extent that the only residual value of the vehicle is as a source of parts or scrap metal or identified by a jurisdiction or insurer that it is not rebuildable. Vehicles designated as non-repairable cannot be rebuilt for operation on public roads. The AAMVA defines a “rebuilt vehicle” as a motor vehicle that has been previously titled or registered, or both, that was incapable of operation or use on highways due to damage and that has been rebuilt to the original design of the vehicle by replacing major component parts with like make and model parts. Prior to being rebuilt, the vehicle may have been declared a total loss by an insurance company and branded salvage but does not extend to include unreparable branded vehicles. On file with the House Transportation & Highway Safety Subcommittee.

<sup>6</sup> s. 320.27(1)(c)4., F.S., defines a “motor vehicle auction” as any person offering motor vehicles or recreational vehicles for sale to the highest bidder where buyers are licensed motor vehicle dealers. Such person shall not sell a vehicle to anyone other than a licensed motor vehicle dealer.

company, in turn, charges a fee to the insurance company, for their services. Buyers at an auto auction must be licensed motor vehicle dealers,<sup>7</sup> and may include salvage motor vehicle dealers<sup>8</sup> who are defined in Florida law as, “any person who engages in the business of acquiring salvaged or wrecked motor vehicles for the purpose of reselling them and their parts.” In Florida, most buyers of rebuildable vehicles are auto dealers, or exporters. Buyers of unrebuildable vehicles are primarily automobile dismantlers and recyclers.

In Florida, a rebuildable designation is called a Salvage Title,<sup>9</sup> and an unrebuildable designation is called a COD.<sup>10</sup> Before a total loss vehicle may be acquired by a salvage motor vehicle dealer, the vehicle owner or insurance company must apply for a Salvage Title or a COD. Since 1989, Florida has utilized a percentage-based threshold to determine whether a total loss vehicle receives a Salvage Title or a COD.<sup>11</sup> When applying for a Salvage Title or COD, the insurance company must provide DHSMV with an estimate of the costs of repairing the physical and mechanical damage.<sup>12</sup> If the estimated costs of repairing the vehicle are equal to 80 percent or more of the current retail cost of the vehicle, as established in any official used car or used mobile home guide, DHSMV is required to declare the vehicle unrebuildable and print a COD.<sup>13</sup> The specific reason why that particular percentage threshold was originally established is unknown.

During the last five years, Florida has issued 171,742 Salvage Titles, compared to 822,778 CODs, or approximately 130,000 more CODs than Salvage Titles issued annually.<sup>14</sup> There is a \$2 fee for each Salvage Title, and a \$3 fee for each COD, both of which are deposited into the General Revenue Fund.<sup>15</sup>

### Rebuilt Inspections

Before a salvage motor vehicle dealer resells a salvage motor vehicle, the salvage motor vehicle must go through a physical rebuilt inspection conducted by DHSMV.<sup>16</sup> The purpose of the rebuilt inspection is to assure the identity of the vehicle and all major component parts which have been repaired or replaced.<sup>17</sup> After the rebuilt inspection, DHSMV affixes a decal to the vehicle that identifies the vehicle as a rebuilt vehicle.<sup>18</sup>

There is a \$40 fee for the initial rebuilt inspection, which is deposited into the General Revenue Fund. If a subsequent inspection is required, there is a \$20 fee, which is deposited into the Highway Safety Operating Trust Fund.<sup>19</sup>

### Other States

A federal law governing the salvage title process uniformly across the country does not exist. The result

is considerable variation in state salvage title laws, processes, and nomenclature.<sup>20</sup> The methods used to determine whether or not a vehicle is unrebuildable also vary, but similar to total loss methods, tend to be damage or theft driven. Such methods tend to be based on “non-repairable” criteria and include a narrative definition, or a value-based criteria and include a specific damage-to-value threshold.

According to a review of other states’ motor vehicle titling regulations, approximately 27 states do not provide a specific level of damage that would prevent the most heavily damaged vehicles from being rebuilt and retitled, 19 states provide some form of a narrative definition describing a level of damage, and four states, including Florida, provide a percentage-based threshold that requires a vehicle to be declared unrebuildable if the estimate of damages is equal to or greater than the respective percentage threshold. Florida,<sup>21</sup> Michigan,<sup>22</sup> Virginia,<sup>23</sup> and Wisconsin<sup>24</sup> each provide a specific percentage-based threshold to determine whether a salvage motor vehicle is designated as unrebuildable. Florida sets its damage threshold at 80 percent, Michigan is 91 percent, Virginia is 90 percent, and Wisconsin sets its threshold at 100 percent.

## **Proposed Changes**

The PCB revises the process for applying for a Salvage Title or COD for a salvage motor vehicle. The PCB removes the 80 percent threshold that requires DHSMV to declare the vehicle unrebuildable in order to print a COD. In doing so, the PCB replaces the 80 percent threshold with a requirement that DHSMV print a COD if a motor vehicle or mobile home:

- is damaged, wrecked or burned to the extent that the only residual value of the vehicle is as a source of parts or scrap metal; or
- comes into this state under a title or other ownership that indicates that the vehicle is non-repairable, junked, or for parts or dismantling only.

In either case, the owner or insurance company which pays money as compensation for total loss of a motor vehicle or mobile home is required to obtain a COD.

Replacing a specific percentage-based threshold, with criteria related to a vehicle being non-repairable, would allow a vehicle owner or insurance company to determine whether or not a total loss vehicle is rebuildable based on the criteria. The effect of the proposed change is that a greater number of salvage motor vehicles will be able to be repaired to the extent that they may be resold as rebuilt vehicles and returned to the road.

As a salvage motor vehicle that can ultimately be sold to repair and drive is generally valued higher than a salvage motor vehicle that must be destroyed and only used for parts, this could result in a reduction in the overall number of vehicles that are given a COD and required to be destroyed.

### **B. SECTION DIRECTORY:**

Section 1: Amends s. 319.30, F.S., relating to salvage motor vehicles.

Section 2: Provides an effective date of July 1, 2014.

## **II. FISCAL ANALYSIS & ECONOMIC IMPACT STATEMENT**

### **A. FISCAL IMPACT ON STATE GOVERNMENT:**

---

<sup>20</sup> National Conference of Commissioners on Uniform State Laws website at <http://www.uniformlaws.org/ActSummary.aspx?title=Certificate%20of%20Title%20Act> (Last viewed 1/17/14).

<sup>21</sup> s. 319.30(3)(b), F.S.

<sup>22</sup> s. 257.217C(2)(b)(i), M.V.C.

<sup>23</sup> s. 46.2-1600, V.S.C.

<sup>24</sup> ch. 340.01(25j), W.S.

1. Revenues:  
See Fiscal Comments.
2. Expenditures:  
See Fiscal Comments.

**B. FISCAL IMPACT ON LOCAL GOVERNMENTS:**

1. Revenues:  
None.
2. Expenditures:  
None.

**C. DIRECT ECONOMIC IMPACT ON PRIVATE SECTOR:**

Because of a lack of data, the private sector impacts cannot be accurately quantified. Allowing a greater number of salvage motor vehicles to be issued a Salvage Title and repaired so that they may be resold as rebuilt vehicles and returned to the road, will likely have a positive fiscal impact on insurance companies, the insurance salvage automobile auction industry, auto dealers and exporters, and to individual motorists who may purchase such vehicles. Reducing the number of vehicles that are issued a COD and required to be destroyed will likely have a negative fiscal impact on the automotive recycling and parts industry.

**D. FISCAL COMMENTS:**

The PCB revises the process for applying for a Salvage Title or COD. A Salvage Title indicates that the vehicle is repairable and a COD indicates that the vehicle is not repairable. There is a \$2 fee for each Salvage Title and a \$3 fee for each COD, both of which are deposited into the General Revenue Fund.

Before a salvage motor vehicle dealer resells a salvage motor vehicle or its parts, the salvage motor vehicle must go through a physical rebuilt inspection conducted by DHSMV. The purpose of the rebuilt inspection is to assure the identity of the vehicle and all major component parts which have been repaired or replaced. After the rebuilt inspection, DHSMV affixes a decal to the vehicle that identifies the vehicle as a rebuilt vehicle. There is a \$40 fee for the initial rebuilt inspection, which is deposited into the General Revenue Fund. If a subsequent inspection is required, there is a \$20 fee, which is deposited into the Highway Safety Operating Trust Fund.

The effect of the proposed change is that a greater number of salvage vehicles will be able to be repaired to the extent that they may be resold as rebuilt vehicles and returned to the road. As a result of the proposed change, the amount of fees collected from the issuance of certificates of destruction (\$3) may decrease, but the amount of fees collected from the issuance of salvage certificates of title (\$2) may increase.

Additionally, because rebuilt vehicles must go through a rebuilt inspection process by DHSMV, the amount collected from rebuilt inspection fees may increase. As mentioned, the \$40 initial rebuilt inspection fee is deposited into the General Revenue Fund and the \$20 re-inspection fee is deposited in the Highway Safety Operating Trust Fund. Because the number of additional vehicles that will undergo a rebuilt inspection, or a subsequent re-inspection, is unknown, the impact to these funds is indeterminate but likely positive.
