(1) SHORT TITLE.—This section may be cited as the"Community Health Center Access Program Act."

(2) LEGISLATIVE FINDINGS AND INTENT.-

452 (a) The Legislature finds that, despite significant 453 investments in health care programs, <u>nearly 6</u> more than 2 454 million low-income Floridians, primarily the working poor and minority populations, continue to lack access to basic health 455 456 care services. Further, the Legislature recognizes that 457 federally qualified health centers have a proven record of 458 providing cost-effective, comprehensive primary and preventive 459 health care and are uniquely qualified to address the lack of 460 adequate health care services for the uninsured.

461 (b) It is the intent of the Legislature to recognize the 462 significance of increased federal investments in federally 463 qualified health centers and to leverage that investment through 464 the creation of a program to provide for the expansion of the 465 primary and preventive health care services offered by federally 466 qualified health centers. Further, such a program will support 467 the coordination of federal, state, and local resources to 468 assist such health centers in developing an expanded community-469 based primary care delivery system.

The Legislature finds that items to 732 consider relative to assessing the physician workforce may 733 include physician practice status; specialty mix; geographic 734 distribution; demographic information, including, but not 735 limited to, age, gender, race, and cultural considerations; and 736 needs of current or projected medically underserved areas in the 737 state. Long-term strategic planning is essential as the period from the time a medical student enters medical school to 738

739 completion of graduate medical education may range from 7 to 10 740 years or longer. The Legislature recognizes that strategies to 741 provide for a well-trained supply of physicians must include 742 ensuring the availability and capacity of quality graduate 743 medical schools and graduate medical education programs in this 744 state, as well as using new or existing state and federal 745 programs providing incentives for physicians to practice in 746 needed specialties and in underserved areas in a manner that 747 addresses projected needs for physician manpower.

748 <u>(3)(2)</u> PURPOSE.—The department of Health shall serve as a 749 coordinating and strategic planning body to actively assess the 750 state's current and future physician workforce needs and work 751 with multiple stakeholders to develop strategies and 752 alternatives to address current and projected physician 753 workforce needs.

754 (4)(3) GENERAL FUNCTIONS.—The department shall maximize the 755 use of existing programs under the jurisdiction of the 756 department and other state agencies and coordinate governmental 757 and nongovernmental stakeholders and resources in order to 758 develop a state strategic plan and assess the implementation of 759 such strategic plan. In developing the state strategic plan, the 760 department shall:

(a) Monitor, evaluate, and report on the supply and
distribution of physicians licensed under chapter 458 or chapter
459. The department shall maintain a database to serve as a
statewide source of data concerning the physician workforce.

(b) Develop a model and quantify, on an ongoing basis, the
adequacy of the state's current and future physician workforce
as reliable data becomes available. Such model must take into

account demographics, physician practice status, place of education and training, generational changes, population growth, economic indicators, and issues concerning the "pipeline" into medical education.

772 (c) Develop and recommend strategies to determine whether 773 the number of qualified medical school applicants who might 774 become competent, practicing physicians in this state will be 775 sufficient to meet the capacity of the state's medical schools. 776 If appropriate, the department shall, working with 777 representatives of appropriate governmental and nongovernmental 778 entities, develop strategies and recommendations and identify 779 best practice programs that introduce health care as a 780 profession and strengthen skills needed for medical school 781 admission for elementary, middle, and high school students, and 782 improve premedical education at the precollege and college level 783 in order to increase this state's potential pool of medical 784 students.

(d) Develop strategies to ensure that the number of graduates from the state's public and private allopathic and osteopathic medical schools <u>is</u> are adequate to meet physician workforce needs, based on the analysis of the physician workforce data, so as to provide a high-quality medical education to students in a manner that recognizes the uniqueness of each new and existing medical school in this state.

(e) Pursue strategies and policies to create, expand, and maintain graduate medical education positions in the state based on the analysis of the physician workforce data. Such strategies and policies must take into account the effect of federal funding limitations on the expansion and creation of positions

797 in graduate medical education. The department shall develop 798 options to address such federal funding limitations. The 799 department shall consider options to provide direct state 800 funding for graduate medical education positions in a manner 801 that addresses requirements and needs relative to accreditation 802 of graduate medical education programs. The department shall 803 consider funding residency positions as a means of addressing 804 needed physician specialty areas, rural areas having a shortage 805 of physicians, and areas of ongoing critical need, and as a 806 means of addressing the state's physician workforce needs based 807 on an ongoing analysis of physician workforce data.

808 (f) Develop strategies to maximize federal and state 809 programs that provide for the use of incentives to attract 810 physicians to this state or retain physicians within the state. 811 Such strategies should explore and maximize federal-state 812 partnerships that provide incentives for physicians to practice 813 in federally designated shortage areas. Strategies shall also consider the use of state programs, such as the Florida Health 814 815 Service Corps established pursuant to s. 381.0302 and the 816 Medical Education Reimbursement and Loan Repayment Program 817 pursuant to s. 1009.65, which provide for education loan 818 repayment or loan forgiveness and provide monetary incentives 819 for physicians to relocate to underserved areas of the state.

(g) Coordinate and enhance activities relative to physician
 workforce needs, undergraduate medical education, and graduate
 medical education, and reentry of retired military and other
 physicians into the physician workforce provided by the Division
 of Medical Quality Assurance, the Community Hospital Education
 Program and the Graduate Medical Education Committee established

830 (h) Work in conjunction with and act as a coordinating body 831 for governmental and nongovernmental stakeholders to address 832 matters relating to the state's physician workforce assessment 833 and development for the purpose of ensuring an adequate supply 834 of well-trained physicians to meet the state's future needs. 835 Such governmental stakeholders shall include, but need not be 836 limited to, the State Surgeon General or his or her designee, 837 the Commissioner of Education or his or her designee, the 838 Secretary of Health Care Administration or his or her designee, 839 and the Chancellor of the State University System or his or her 840 designee from the Board of Governors of the State University 841 System, and, at the discretion of the department, other 842 representatives of state and local agencies that are involved in assessing, educating, or training the state's current or future 843 844 physicians. Other stakeholders shall include, but need not be 845 limited to, organizations representing the state's public and 846 private allopathic and osteopathic medical schools; 847 organizations representing hospitals and other institutions 848 providing health care, particularly those that currently provide 849 or have an interest in providing accredited medical education 850 and graduate medical education to medical students and medical 851 residents; organizations representing allopathic and osteopathic 852 practicing physicians; and, at the discretion of the department, 853 representatives of other organizations or entities involved in 854 assessing, educating, or training the state's current or future
