HB 31 2011

A bill to be entitled

An act relating to the Office of the Chief Technology Officer; creating the Office of the Chief Technology Officer within the Department of Financial Services; requiring that the Chief Technology Officer be appointed by the Governor and Cabinet; requiring that the office be composed of three divisions; providing duties of such divisions; requiring that the Chief Technology Officer develop a multiyear plan of action for the purpose of meeting specified objectives; providing an effective date.

WHEREAS, the Legislature finds that it is necessary to reorient the deployment of public technology infrastructure in a manner that is consistent with the statutory objectives in chapter 282, Florida Statutes, create an accountable governance system that continues to consolidate separate state data centers and develop common electronic communications and messaging systems, and provide reasonable assurances to the public that their contact with governmental services is timely, accurate, responsive, and respectful of the need to maintain secure networks that do not compromise personal identifying information protected by law or duty, and

WHEREAS, it is the intent of the Legislature to create a road map for successive governance deployment initiatives, thereby producing a sound management system, disciplined procurement systems, and effective operational controls for succeeding generations of taxpayers and recipients of public services, NOW, THEREFORE,

HB 31 2011

Be It Enacted by the Legislature of the State of Florida:

- Section 1. Office of the Chief Technology Officer.-
- (1) There is created within the Department of Financial Services the Office of the Chief Technology Officer. The office shall be led by the Chief Technology Officer, who shall be appointed by the Governor and Cabinet.
 - (2) The office shall be composed of three divisions:
- (a) The Division of Strategic Procurement, which includes the development of all enterprise information technology procurement and acquisition-management systems across state agencies, whether owned or contracted, and has the objective of achieving unified accountability.
- (b) The Division of Policy Formulation, Development, and Standards, which sets, by rule or contract, the technical and architectural expectations for current and emerging technologies and establishes new human capital skill sets, competency expectations, and total compensation for all information technology professions within state agencies.
- (c) The Division of Implementation, which is responsible for the execution, timing, and integration of specific technology components and business domain management and the retention of agency expertise in key legacy applications in nonstrategic management systems.
- (3) The Chief Technology Officer shall develop a multiyear plan of action that builds upon the initial objectives contained in part I of chapter 282, Florida Statutes, and develops or

HB 31 2011

recommends the legislative actions necessary to make the following changes to existing enterprise services:

- (a) The consolidation of all state agency data centers into three primary locations or entities by January 1, 2014.
- (b) By December 31, 2011, the initiation of the development of a revised financial management infrastructure for state government which causes the reengineering of subsystem components, including, but not limited to, the legislative appropriations system and planning and budget system, cash management, human resources, a successor accounting system, and strategic and tactical procurement and acquisition management.
- (c) By January 1, 2012, the reconfiguration of the significant structural components of the operations of existing state agencies, including, but not limited to, the Department of Management Services, the Department of Financial Services, and the Agency for Enterprise Information Technology.
- (d) By a date to be determined by the Governor and Cabinet and subject to specific legislative appropriation, the creation of successor customer relationship-management systems, including, but not limited to, professional licensure, facility licensure, regulatory inspections, and compliance and monitoring systems.
 - Section 2. This act shall take effect July 1, 2011.
