WHEREAS, the opioid epidemic continues to ravage American families across the United States, and

WHEREAS, the Centers for Disease Control and Prevention reported more than 100,000 overdose deaths in the United States during the 12-month period that ended in February 2023, and

WHEREAS, most of these deaths were caused by illicit synthetic drugs like clandestinely manufactured fentanyl, often in combination with other drugs, and

WHEREAS, in 2021, nearly 71,000 drug overdose deaths involving synthetic opioids occurred in the United States, which was more deaths that year than from any other type of opioid, and

WHEREAS, synthetic-opioid-involved death rates increased by

WHEREAS, by comparison, from 1999 to 2021, nearly 280,000 people died in the United States from overdoses involving prescription opioids, and

WHEREAS, the number of drug overdose deaths involving prescription opioids in 2021 was nearly five times the number in 1999, and

WHEREAS, in 2021, an average of 45 people died each day from a prescription opioid overdose, for a total of nearly 17,000 deaths, and

WHEREAS, in 2021, nearly 21 percent of all opioid overdose deaths involved prescription opioids, and

WHEREAS, 60 percent of all opioid overdose deaths occur in the home, and

WHEREAS, in 67 percent of opioid overdose deaths, another person was present at the time and witnessed the death, and

WHEREAS, opioid antagonists are a safe, powerful medication that can reverse opioid-related overdoses and prevent overdose deaths, and

WHEREAS, most Americans remain unaware of the safety, availability, and efficacy of opioid antagonist medications as a life-saving treatment for opioid overdose, and

WHEREAS, the national advocacy efforts of David Siegel and
