**Representative Tracie Davis Issues Statement on Opening of
COVID-19 Vaccination Site at Edward Waters College**

Jacksonville, FL – Representative Tracie Davis (D-Jacksonville) issued the following statement on Edward Waters College becoming a COVID-19 vaccination site:

“Trust is a factor in the African American community regarding vaccinations that must be acknowledged. Today is about our community, equitable access, and doing more than just enough; it is bigger than politics.

I am confident with Edward Waters College and other community partners working together to provide a permanent vaccination site in this community that will increase the trust and more African Americans will have access to the coronavirus vaccination in an effort to save lives.”
